"...the storytelling spacecraft..."

Developed by **LUNA**  
AIRCRAFT

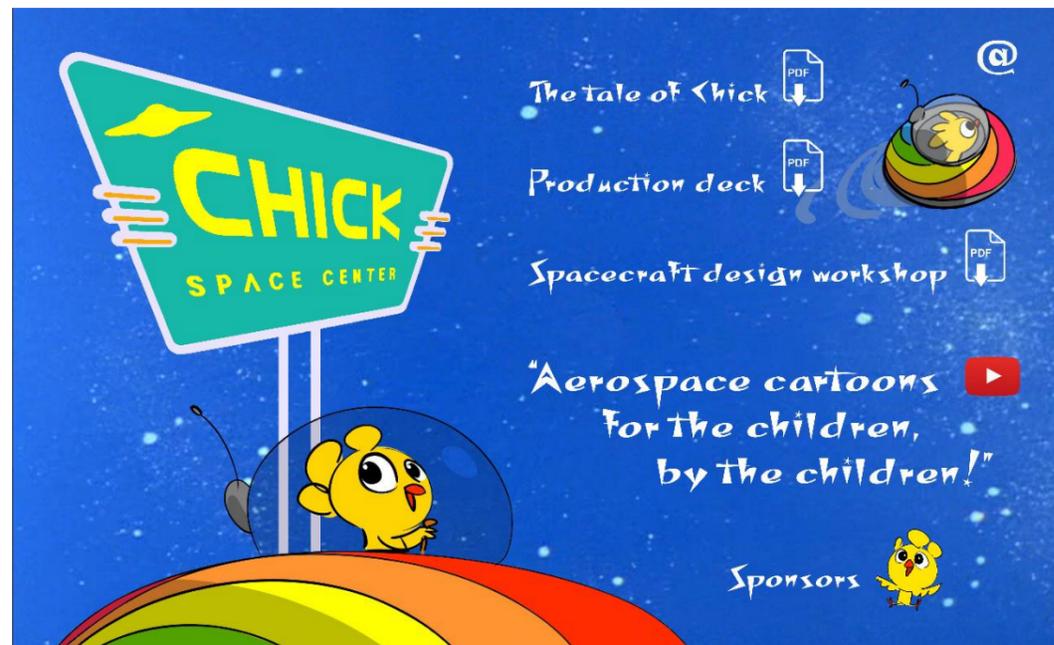

LUNA   
A I R C R A F T

Developed by Luna Aircraft, the Transport is a space vehicle inviting its guests to travel the world of storytelling via tales, animations productions and exhibitions.

Destined first to venues such as airports and theme parks, the Transport is poised to expand its presence on the Moon and on Mars as the first outer-space recreational destination.

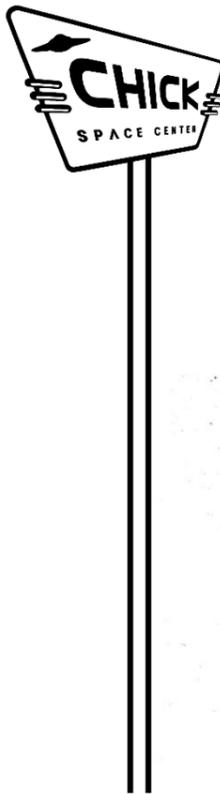

To launch this operation, Luna Aircraft joins Brittany Studios specialized in young children animation with an educational touch on various art forms. Introduced to the world by "T.P" the mascot of the Transport program, "Chick Space Center" is at the heart of the first Transport crafts manufacturing in sync with Brittany Studios animation production of the Chick Space Center miniseries. A fun art form before taking off!

[www.chickspacecenter.com](http://www.chickspacecenter.com)

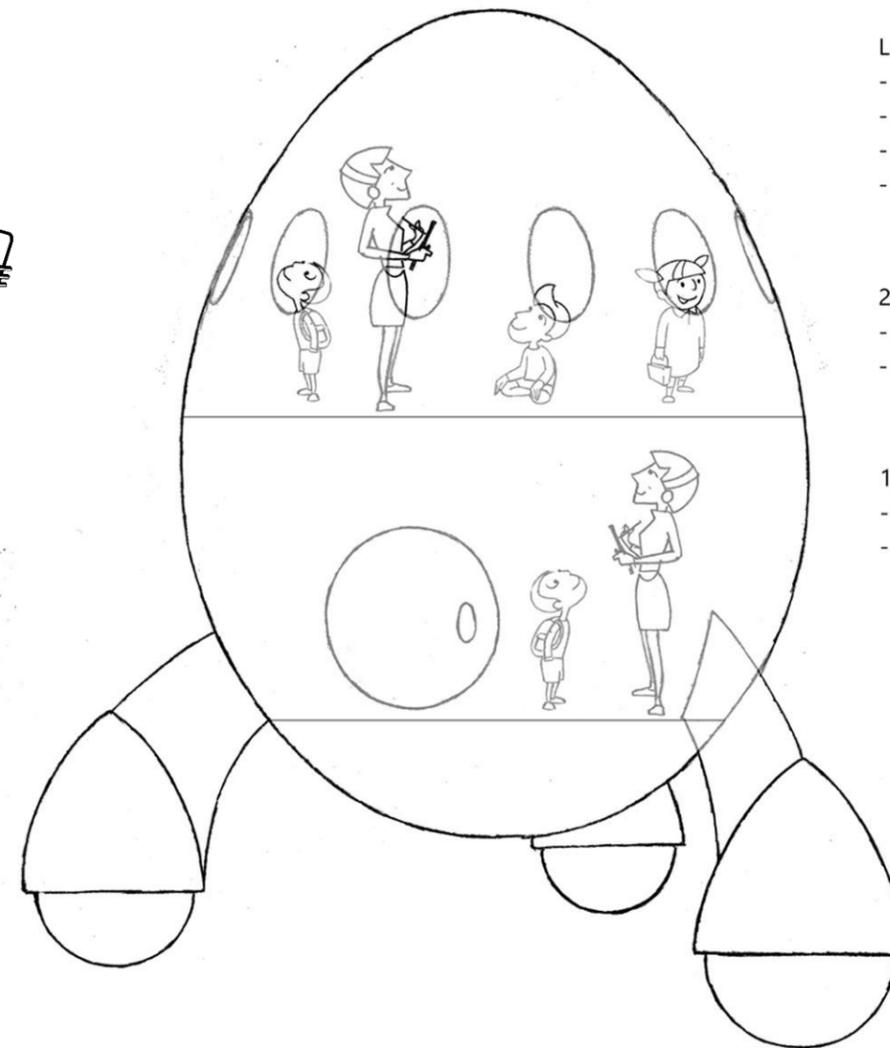

The Transport is a stand-alone leisure venue planning franchising worldwide associated with the production of its animation programs to keep the venue featuring monthly new episodes on the adventures of its genuine characters.

Also contributing to the arts monthly renewal is the Transport exhibition program which presents both intuitive artworks by children worldwide and local artists' original productions on the topic being featured in the Transport at a given time.

"Bringing the arts and fun across the cosmos!"

A recreational spacecraft inviting on its first floor children to enjoy the tale and cartoons of Chick's space odyssey and to discover on its second floor the wonderful artworks about spacecrafts imagined by children from around the world. While visiting one of our venues, sit at our cozy atelier and illustrate your own space vehicle for Chick to travel to the stars!

Locations:

- Airports
- Thema parks
- Shopping malls
- City centers

2nd floor:

- Chick Space Center exhibition
- Chick Space Center atelier

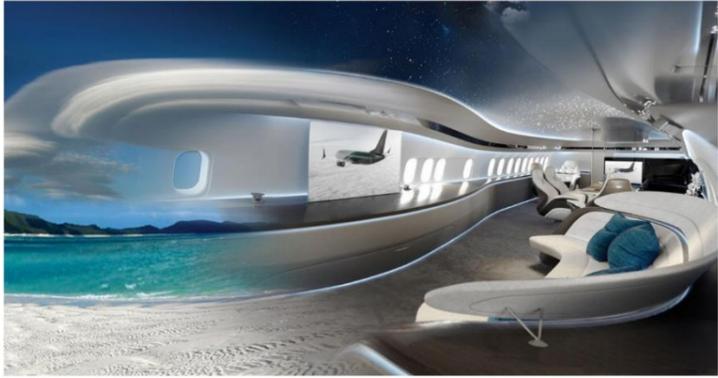

1st floor:

- "The tale of Chick" videobook
- Chick Space Center cartoons

Developed & Manufactured by

... for children of Earth and beyond.

Chick Space Center Transport "feel"
